

Force Motors invests ₹1,000 crore on 11-18 seater LCV platform

Mumbai: Pune-based Force Motors Ltd on Wednesday unveiled an all-new light commercial vehicle (LCV) platform that can be used to produce several models with 11-18 seating capacity. Developed over the past four years with an investment of over ₹1,000 crore, the new LCV platform is also touted as the successor to Force Motors' popular Traveller range of LCVs.

In an interview, Prasan Firodia, managing director, Force Motors said, "The all-new LCV platform is modular and hence can have powertrain options including diesel, CNG and electric. The 11-18 seater platform will be more premium than the existing Traveller range and can cater to the shared mobility requirements in urban spaces which can include tour applications, corporate fleet, school buses, ambulance and others."
